

Is your facility prepared for
a Sudden Cardiac Arrest?

Nearly 2,300 Americans die of cardiovascular disease each day – one person every 38 seconds! 325,000 of these people die every year of sudden cardiac arrest (SCA), a form of cardiovascular disease. Resuscitating these victims requires the use of an automated external defibrillator (AED) along with high-quality CPR.

The ZOLL® **AED Plus**®, with its simple prompts and Real CPR Help®, can assist anyone in an emergency and help save a life.

International, Inc.

The First and Only Full-Rescue AED

Why you need an AED

Over 325,000 people die each year from SCA. Good CPR, with chest compressions more than two inches deep, can help sustain a victim of SCA until an ambulance arrives, but full resuscitation is very rarely possible with CPR alone.

The probability of completely resuscitating someone in cardiac arrest increases radically if you use a nearby AED. A recent study of 13 different cities* found that if you just wait for the ambulance to arrive, the chances of survival are only 5%. If someone performs CPR before the ambulance arrives, the chances almost double to 9%. But if someone can apply an AED before the ambulance arrives, the chances improve to 24%.

The people in your facility need the best possible chance of surviving cardiac arrest. A slim 5% chance is unacceptable.

Why you need an AED Plus from ZOLL

The AED Plus is the first and only AED that can deliver a defibrillating shock along with Real CPR Help technology that provides rescuers real-time feedback for both depth and rate of chest compressions during CPR. It provides the best possible support to rescuers of a cardiac arrest victim.

Why you need Compliance Program Management

A successful AED program requires more than just installing AEDs in your facility. You need to train rescuers, maintain your AEDs to be sure they are ready to use, know and comply with the requirements dictated by local regulations.

You can outsource the management of your AED program to ZOLL's partner En-Pro. Their PlusTrac™ and PlusLearning™ systems can keep everyone and every AED in your program ready-to-go and in total compliance.

ZOLL AED Package Offerings Available:

(semiautomatic and fully automatic models available)

- ZOLL AED Plus Package with medical prescription

Includes AED Plus, one set of adult electrodes (CPR-D-padz®), one sleeve of batteries, carry case, and medical prescription.

- ZOLL AED Plus Package with PlusTrac Professional 1

Includes AED Plus, one set of adult electrodes (CPR-D-padz), one sleeve of batteries, carry case, and one-year AED Compliance Program Management.

- ZOLL AED Plus Package with PlusTrac Professional 5

Includes AED Plus, one set of adult electrodes (CPR-D-padz), one sleeve of batteries, carry case, and five-year AED Compliance Program Management.
