The Gentle Giants of Cut-Resistant Hand Protection

As the largest living primate on earth, gorillas possess herculean strength with a generally soft and gentle nature. Similarly, the new Saf-T-Gard® Versa-Gard® Flex G2 & G4 Cut-Resistant Gloves Made with GorillaYarn® exhibit an inherent strength and softness. These gloves mark the debut of Saf-T-Gard's GorillaYarn®, a proprietary new yarn blend designed to supply continuous comfort without compromising cut resistance. The Saf-T-Gard® GorillaYarn® family utilizes the latest in cut-resistant technology, and its products can be constructed to achieve different cut levels that are all tested using the most recent standards.

Gloves That Stand up to Their Environment

It's a jungle out there! Only the Saf-T-Gard® Versa-Gard® Flex G2 & G4 Cut-Resistant Gloves Made with GorillaYarn® deliver the performance necessary to combat all of the hazards you encounter in your habitat. The gloves' polyurethane coated palms are highly resistant to abrasions, punctures, snags and tears, grip well on wet or oily surfaces, and when combined with GorillaYarn® shells, provide an ideal balance of comfort and ANSI Cut Level A2 and ANSI Cut Level A4 protection. Moreover, the ergonomically-designed hand shape is form-fitting, flexible and offers increased dexterity and tactile sensitivity for small parts handling making these gloves ideal for use in assembly, metal/glass handling, maintenance, construction, food processing and general-duty applications.

The glove pictured above is the VGF-5512. All of the features of this glove are the same as the VGF-5524, unless otherwise noted.

Features and Benefits

- Carefully crafted using Saf-T-Gard® GorillaYarn®, a proprietary, engineered, cut-resistant yarn blend, these 13 gauge seamless machine knit gloves are designed for protection against hazards in some of the toughest work environments and deliver powerful comfort and ANSI A2 (VGF-5512) and A4 (VGF-5524) cut resistance
- Ergonomically-designed hand shape is form fitting, flexible and offers increased dexterity and tactile sensitivity for small parts handling
- The back of the glove is uncoated for breathability
- Polyurethane palm coating channels away oils and ensures a secure grip while also providing significant resistance to abrasions, punctures, snags and tears
- Continuous knit wrist color-coded elasticized finish reduces fraying and provides a visual aid in sizing for easy sorting and dispensing
