

V-FLEX™ Full-Body Harness

Increased Mobility

Using an exclusive racing style design, webbing is routed across the chest for a secure and comfortable fit—reducing the need for adjustments throughout the day and allowing for better mobility on the job.

Effortless Donning

Patent-pending RaceFLEX™ connection makes donning your harness simple—like buckling a seatbelt.

Intuitive Safety

Integrated trauma relief steps are stowed away in leg pads to create a low profile option for suspension trauma prevention.

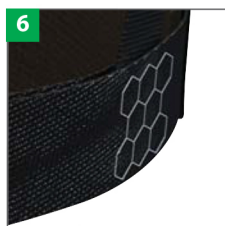

Superior Comfort

Reduce fatigue and heat stress with a breathable, contoured pad material that conforms to the shape of your shoulder for increased comfort.

No Fuss Fit

Just like a backpack, the V-FLEX Harness includes thumb loops for easy pull down adjustment of the harness.

Ease of Inspection

Unique identifiable stitch patterns, along with fewer stitch points saves times during pre-use inspection process.

Easy to Connect

Dedicated attachment point saves time when attaching Personal Fall Limiters.
