SafetyPlusWeb™

Safety Management Software

- How do you track and manage employee requirements and corresponding expirations?
- Are you able to record and utilize leading and lagging safety indicators to improve your safety program over time?
- Is your safety data and documentation readily accessible across your organization?

Comprehensive safety management software for companies of all sizes.

Training
LMS with 67 Training Videos

Requirement Tracking
Proactive Notifications

Incident Management
Automated OSHA Logs

Electronic Roster Sheets
1000+ Safety Documents

Audits
Hazard ID & Corrective Actions

Analytics
Leading & Lagging Indicators

SPW™ SiteTracker

Contractor Validation

- How do you know if the workers on your jobsite have been properly trained to perform their work?
- What are your worker site-entry requirements? Are they clear and consistently enforced?
- Do you have a means of collecting safety data from your subcontractors (i.e., Safety Meetings, Audits, JSAs)

Sub-contracted companies don't get hurt… their workers do.
