

BRINGING WORKERS HOME SAFELY SINCE 1936

### Compact Design for Convenient Storage and Reduced Shipping Costs

Emergency rescue workers everywhere have a new reason to get hooked on Voltgard® Electrical Safety products with the arrival of the innovative new **Saf-T-Gard® Voltgard® Telescopic Insulated Rescue Body Hook**. The unique telescopic handle design collapses to an overall length of 41" (RESCUE-6T) or 43" (RESCUE-8T) to conveniently fit inside a standard shipping carton (43" x 20" x 2").

RESCUE-8T

Retracted

*Each rescue hook stick is electrically proof tested. Retests are recommended every two years; must pass a test of 75kV per foot in compliance with ASTM F-711 standard specifications. Contact Saf-T-Gard at 1-800-548-GARD (4273) for more information on testing services.*

### Multi-Length and Multi-Faceted

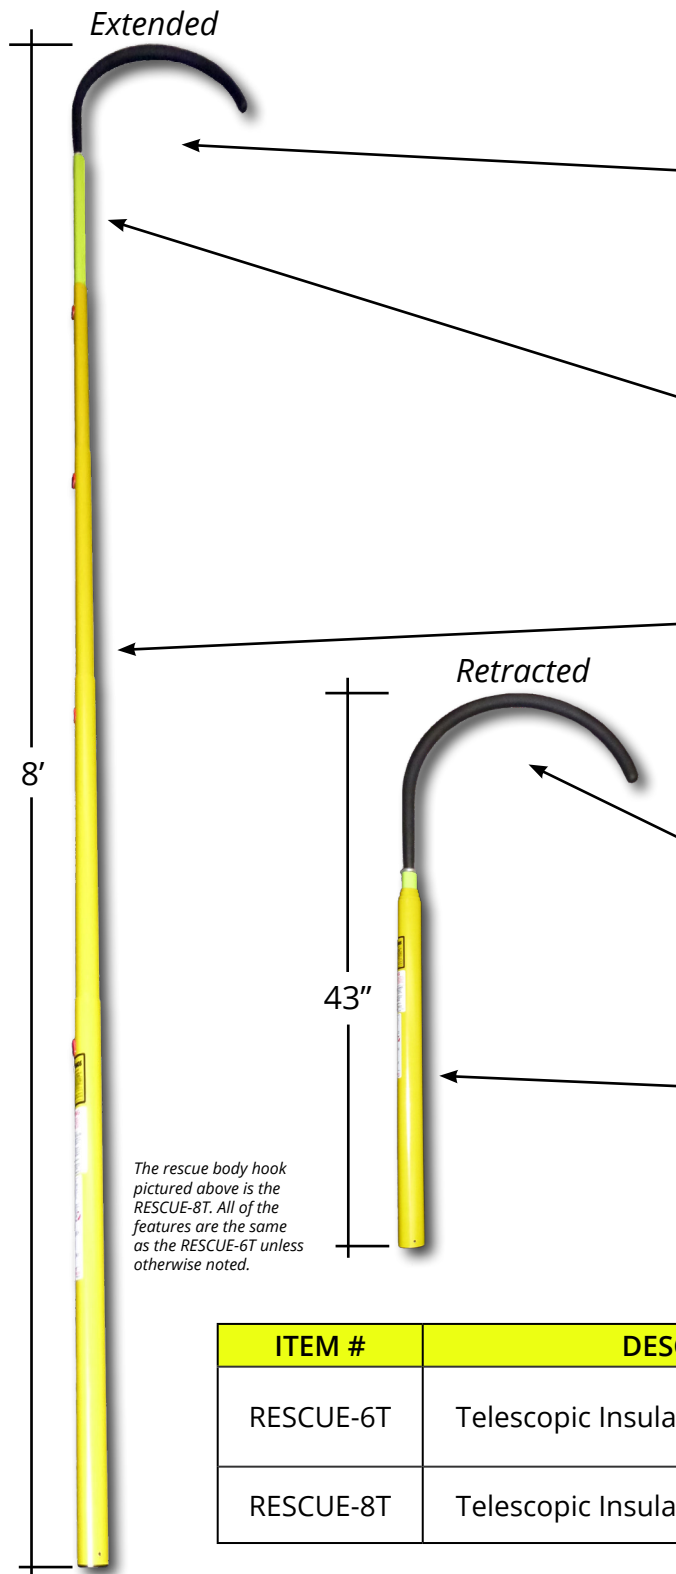

Designed to comply with OSHA 1910.269(j) for the construction of live line tools and OSHA 1926.957 for the use of live line tools, the **Saf-T-Gard® Voltgard® Telescopic Insulated Rescue Body Hook** is coated and heat-treated with an 18" opening and mounted on a 6' (RESCUE-6T) or 8' (RESCUE-8T) telescopic fiberglass handle to rescue workers from confined spaces, in vaults, near electrical cabinets or switch gear. The thicker, sturdier hook is less likely to break, the Hi-Viz yellow color at the top of the telescopic handle provides added visibility and the "No-Twist" triangular design allows the telescopic handle to easily extend and lock when fully retracted for use in first aid rescue for public utilities, fire and emergency response public safety departments, emergency response units for electric vehicles, auto dealerships servicing electric vehicles, and public swimming pools.

**Save 50-90% on Shipping Costs\* by Eliminating Freight  
Carrier Dimensional-Based Surcharges!**

8'

43"

The rescue body hook pictured above is the RESCUE-8T. All of the features are the same as the RESCUE-6T unless otherwise noted.

### Features and Benefits

- Coated and heat-treated with an 18" opening and mounted on a 6' (RESCUE-6T) or 8' (RESCUE-8T) telescopic fiberglass handle for emergency rescue of injured personnel from hazardous areas
- Hi-Viz yellow portion at the top of the telescopic handle provides added visibility
- "No-Twist" triangular design allows the telescopic handle to remain in a locked position when fully retracted
- Constructed using a thicker, sturdier hook than most other competitive models, which is less likely to break off from the handle
- The unique telescopic handle design collapses to a compact overall length of 41" (RESCUE-6T) or 43" (RESCUE-8T) to conveniently fit inside a standard shipping carton (43" x 20" x 2") for ease of transportation/shipping
